## Compliance

# ESF Compliance

---

We represent several Providers for their internal audit and monitoring of Skills Support for the Workforce and Skills Support for the Unemployed.

We have also in the past carried out audits for standalone ESF Projects including Youth East and other programmes.

We can design an approach based around your budget that gives you assurance on your evidence of delivery. With regards project closure evaluation we can also complete these for you.

## DROWNING IN BUREAUCRACY?

We re-designed several large Provider sign up templates this year resulting in on average a 50% reduction in paper use.

For another client we merged the enrolment and learning plans of their seven lead providers into one approved smooth documentation suite allowing for significant time savings in sign up administration burden.

You'd be surprised at just how effective we can be!
