

# Funding Optimisation

# Funding Optimisation

---

Within education today there is a continued push from the government for more delivery for less cost. That puts a lot of pressure on organisations to be efficient and effective when it comes to their programme design and systems in place to ensure quality of delivery but at an optimal cost.

One of SRF's most popular strategic services is Funding Optimisation, where we can look at the programmes of delivery, the claims made and see where you are not at your

most efficient and where you could recoup additional funding.

Every day we see systems in operation so we know what works and what doesn't. This might be helping to develop a Learning Support claim, maybe it's amending the delivery mechanism and dates you plan to deliver. You'd be surprised at what one day of consultancy can do.

## CASE STUDY

One client delivering Hairdressing Apprenticeships had a delivery package that included regular day release. A significant number of learners had maths and english skills below level 1 and because of this they provided smaller class sizes and a Learning Support assistant in the class which was absolutely necessary to help learners achieve. Historically no support claim was made as they worried about SFA audit and did not have confidence in their administration and evidence system to claim for it.

SRF provided a Support Policy, Support Plan and review template, staff training on evidencing activity and now the Provider is able to successfully support a valid claim of over £100,000.
