# Funding Rules Advice

---

Though not a replacement for guidance you can obtain from the Agencies, SRF do offer a service to their clients where questions from your staff can be sent and answered within 24 hours.

Maybe it's a question about funding rates for a framework, or whether a passage of guidance has been understood correctly, or maybe you just want to know what a rule is. Perhaps you're sure of a rule and just want to be certain? We can arrange an ad hoc or retainer based service.

## DID YOU KNOW?

One quick question answered can open the door.

Last year a client asked us about increasing their funding claim for functional skills in Intermediate Apprenticeships as though they had specialist staff for Maths and English, more and more learners were entering with transferable skills at level 1 and so a staff resource was being wasted. We identified that though the level 2 was offered it was not pushed too strenuously by the recruitment team. All could be funded for level 2 functional skills and within an eighteen month framework this was certainly achievable so we advised a small incentive scheme may work and the Provider was able to add significant revenue while making use of their Maths and English teaching staff, improving their qualitative offer.
